## ANNUAL REPORT

- of the -

## MEDICAL OFFICER OF HEALTH

- and -

Sanitary Inspector

for

1937

form the same services and a service of

Mr. Chairman and Gentlemen,

I beg to submit the Annual Report on the Vital Statistics and Sanitary Administration of the District for the year ending December 31st 1937.

## STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area (in acres).	-		31,250
Population: Registrar-G	enerals estimate	for Mid-year	. 5,310
Number of inhabited hou	ses according to	Rate Book.	1673
Rateable Value.		-	£17,783
Sums represented by a p	enny rate.	- 14	£77: 2: 3:

SOCIAL CONDITIONS The district comprises seventeen parishes and is rural in character, except for the market-town of Tenbury. Agriculture, including fruit and hop growing is the chief industry and provides work for the greater portion of the adult male population.

Three parishes added to the district in 1933 are on the coal measures, where a number of pits are at work and provide employment for a considerable number of men.

## EXTRACTS FROM VITAL STATISTICS OF THE YEAR

Live Births	Legitimate Illegitimate	Total M.  85 50  5 3  90 53	F. 35 )Bir 2 ) of 37 ) re	oth Rate per f the esting esident pop 16.9	nated
Still-births	2. Rate per	1000 total	(live &	still) bin	cths. 21
Deaths 77.	Rate per 100	O estimated	resident	t population	on. 12.6
Deaths from 1	puerperal cause	es			Nil.
Death Rate of	f Infants under	r one year	of age:-		
All infants p	per 1000 live 1	births		-	11
Legitimate infants per 1000 legitimate live births.					
Illegitimate	infants per 10	000 illegit	imate liv	re births.	Nil.
Deaths from (	Cancer (all age	es) -		-	8
Deaths from A	Measles (all ag	ges) -		( <b>-</b> ),	Nil.
Deaths from V	Whooping Cough	(all ages)		-	Nil
Deaths from I	Diarrhoea (unde	er 2 years	of age).	-	Nil.

The Registrar-General's estimate of the population was the same as last year.

THE BIRTH-RATE (16.9) is higher than it has been for some years. The Rate for England and Wales for the year was 14.9

Five births were illegitimate, equal to 5 per cent of the total.

DEATH RATE. (12.6) is well below the rate of the previous year 16.5 and using the Factor supplied by the Registrar-General in order to make it comparable from a mortality point of view with the crude death-rate of the Country as a whole or with the mortality of other areas, the crude death-rate of which has been similarly modified with its own factor for the purpose, the resulting adjusted death-rate is 9.6 as compared with 12.4 for England and Wales for the year.

The chief causes of death were: - Influenza 4; Tuberculosis of the Respiratory System 7; Cancer 8; Diabetes 2; Cerebral Haemorrhage 4; Heart Disease 17; Other Circulatory Diseases 3; Bronchitis 2; Pneumonia 1; Peptic Ulcer 4; Appendicitis 1; Cirrhosis of Liver 1; Other Liver Diseases 1; Digestive Diseases 2; Premature Birth 1; Senility 4; Suicide 3; Other Violence 4; and other defined diseases 5.

The death-rate for Pulmonary Tuberculosis for the year was 1.3 per 1000 of the population and for Cancer 1.5. Both these rates are higher than the average for the area, the rate for Tuberculosis especially.

INFANTILE MORTALITY RATE (11) This is a very favourable rate based on only one death of an infant under one year of age due to Premature Birth.

The average of the previous five years for the area was 53 and the rate for England and Wales for the year 58.

<u>T</u>	lenbury R.D. 1936	Tenbury, Average of 5 years 1932 - 36	England & Wales 1936
Birth-rate.	16.9	15.3	14.9
Death-rate: crude corrected	12.6 9.6	14.1	12.4
Infantile Mortality Rate.	11	53	58

## GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

#### 1. PUBLIC HEALTH OFFICERS OF THE AUTHORITY.

Mr. J. E. Parkinson has been Sanitary Inspector since May 1932. He holds the certificate of the Royal Sanitary Institute and in addition to his ordinary duties, he is superintendent of Scavenging, Meat Inspector and Water Engineer.

A contribution is made to his salary and that of the Medical Officer of Health under the Public Health Acts.

. And the state of t and the state of t LABORATORY FACILITIES. The County Council Laboratory at Worcester is available for bacteriological and chemical examinations of pathalogical specimens and water samples and is freely used and is of great value to the district.

AMBULANCE FACILITIES. Tenbury Hospital provide an ambulance for the removal of accidents and other cases, and Worcester Fever Hospital send for infectious cases.

NURSING IN THE HOME. There are District Nurses working in the parishes of Lindridge, Eardiston and Tenbury.

There are no Clinics or Centres in the Area.

HOSPITALS. There is a Poor Law Hospital at Tenbury and the Burford Cottage Hospital on the border of the district is managed and supported chiefly by the town and district of Tenbury.

## SANITARY CIRCUMSTANCES OF THE AREA.

1. Water. Mr. Parkinson reports that "during May the rate of the intake of water from the springs at Clee Hill (the source of the Tenbury town supply) began to fall off. During the summer the supply did not improve and with increased consumption during the warmer months the system required careful watching. In order to build up and maintain a working head at the reservoir it was necessary at times for short periods to close the supply main during the night hours. Day supplies were not interfered with and no inconvenience was caused to consumers. In September a temporary pipe between Tenbury and Birmingham Systems was laid and later replaced by a permanent connection through which a supplementary supply was obtained. Under an old agreement Birmingham Corporation will, if required make up Tenbury's supply to 50,000 gallons per day free of charge, should Tenbury's daily yield fall below that figure."

Apart from usual routine inspections for detection of wasting of water, a systematic inspection was made towards the end of the year. Three hundred and forty-six premises were inspected for the detection of defective water fittings and wasting of water. Where defects were found, notices were served.

During the year it was decided to prepare a specification for providing a water supply to approximately 26 houses at Old Wood, a district about one mile from Tenbury town.

A Deacon Waste Water Recording Meter is to be installed on the 5" main leading from the Reservoir to the town. Seventy yards of new water main was laid and one house connected to public supply during the year.

#### 2. Drainage and Sewerage.

New drains were constructed or old drains amended at twentythree premises and two privies converted into water closets and two to pail closets. No new sewers were laid during the year and only one house connected to existing sewer.

The provision of Sewage Works to deal with the Sewage from the town of Tenbury and also to permit of the conversion of the pail closets into the water carriage system is a matter that

The very forestal listers when the County County Alfred Allerands - action of the County County for the County and the County of the County County for the County C Description of the second seco should be considered in the interest of Public Health, and also of economy. The longer it is delayed the more difficult will be the Scheme, and as the Authority under the Rivers Pollution Acts you have a certain responsibility in this matter. Three towns lower down the Severn are taking their drinking water from this source.

## SANITARY INSPECTION OF THE AREA.

Mr. Parkinson inspected 179 houses during the year and served 64 informal notices, all of which were complied with. They included new drains or repairs at 23 houses. New closets at 5; houses otherwise in a bad sanitary condition, or damp, dirty or admitting rain 23: offensive accumulations 1: Animals so kept as to be a nuisance 1: No case of overcrowding was discovered.

SHOPS. No action was necessary during the year under the provisions of the Shops Act 1934, relating to the ventilation and sanitary conveniences of shop premises.

ERADICATION OF BED-BUGS. No complaints were received in respect of the bed-bug and no premises were found to be infested with them, either Council houses or under private ownership.

#### SCHOOLS.

The privies at Pensan elementary schools were abolished and water closets installed during the year.

No school was closed during the year on account of the prevalence of Infectious Disease.

#### HOUSING.

#### 1. INSPECTION OF DWELLING-HOUSES DURING THE YEAR:a. Total number of dwelling-houses inspected (1) for housing defects (under Public Health and 179 Housing Acts.) 336 Number of inspections made for the purpose Number of dwelling-houses which were inspected (2)38 and recorded under Housing Regulations 1925. b. Number of inspections made for the purpose. 54 Number of dwelling-houses found to be in a state (3)so dangerous or injurious to health as to be 25 unfit for human habitation. Number of dwelling-houses found not to be in all (4) respects reasonably fit for human habitation. 13

C.	Number of new cases of overcrowded reported in 1936.  1. Number of cases of overcrowding received.  2. Number of persons concerned in such cases.  Particulars of any cases in which dwelling-houses have again become overcrowded after abatement.	14 7 39 0					

2

## INSPECTION & SUPERVISION OF FOOD.

a. Milk Supply. There are 95 cowkeepers and Milk Sellers on the Register occupying 119 Cowsheds. They were all regularly inspected and thirteen notices were served in respect of defects in lighting 5, Structure of floors 5, Drainage 2, Want of Cleanliness 12. Eleven of these notices have now been complied with. Two Producers hold licenses for Tuberculin Tested Milk and six for Accredited Milk in the Area.

Meat and other Foods. There are seven private slaughter-houses in the area and they have been visited regularly and the meat inspected. The carcases of one cow and two pigs were condemned and destroyed and parts of 2 cows, 23 sheep and six pigs were also condemned and destroyed.

# PREVALENCE OF AND CONTROL OVER, INFECTIOUS & OTHER DISEASES.

The Council have arranged with the Worcester City to receive cases from the District in their Infectious Disease Hospital. Two cases of Diphtheria and one of Scarlet Fever were treated there during the year.

The two Diphtheria cases were imported by Hop-pickers and developed before the picking commenced. They were sent to Worcester and no further cases occurred. All the children who had been contacts were swabbed with negative results. Only four cases of Scarlet Fever were notified during the year, two at Pensax in January and two in different parishes in December.

## NOTIFIABLE DISEASES DURING THE YEAR 1937.

<u>Disease.</u>	Total Cases Notified	Cases admitted to Hospital	Total Deaths
Scarlet Fever Diphtheria Puerperal Pyrexia Erysipelas	4 2 3 1	1 2 3 0	0 0 0 0
	10	6	0

## TUBERCULOSIS

## NEW CASES and MORTALITY DURING 1937

There were only six notifications of Respiratory Tuberculosis and seven deaths all in adults.

No action was necessary under the Public Health (Prevention of Tuberculosis) Regulations 1925 relating to persons suffering from Tuberculosis employed in the Milk Trade, or under Section 72 of the Public Health Act 1936.

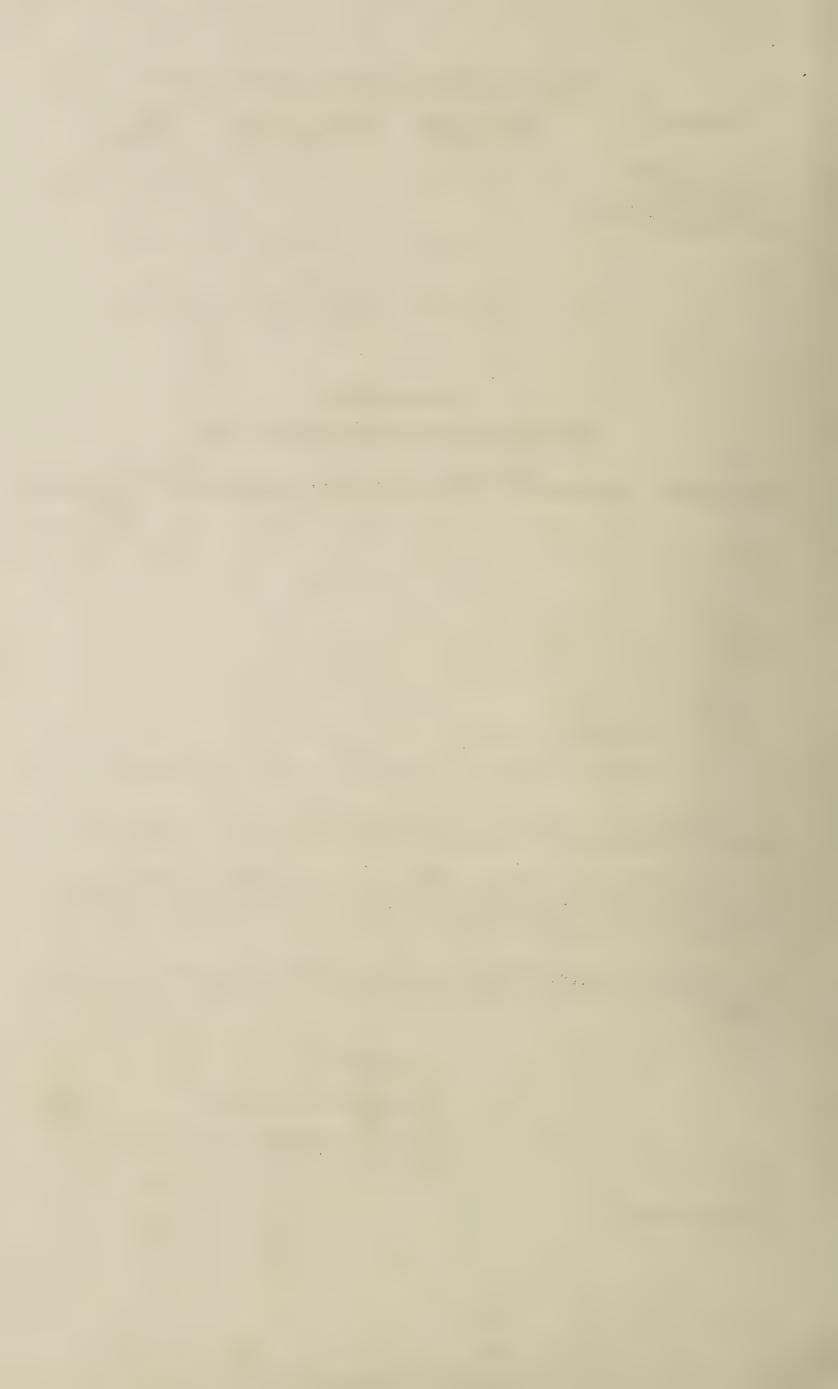

There were on the Register at the end of the year 14 male and 5 female pulmonary cases and 7 male and 8 female Non-pulmonary cases.

I am, Gentlemen,

Your obedient Servant,

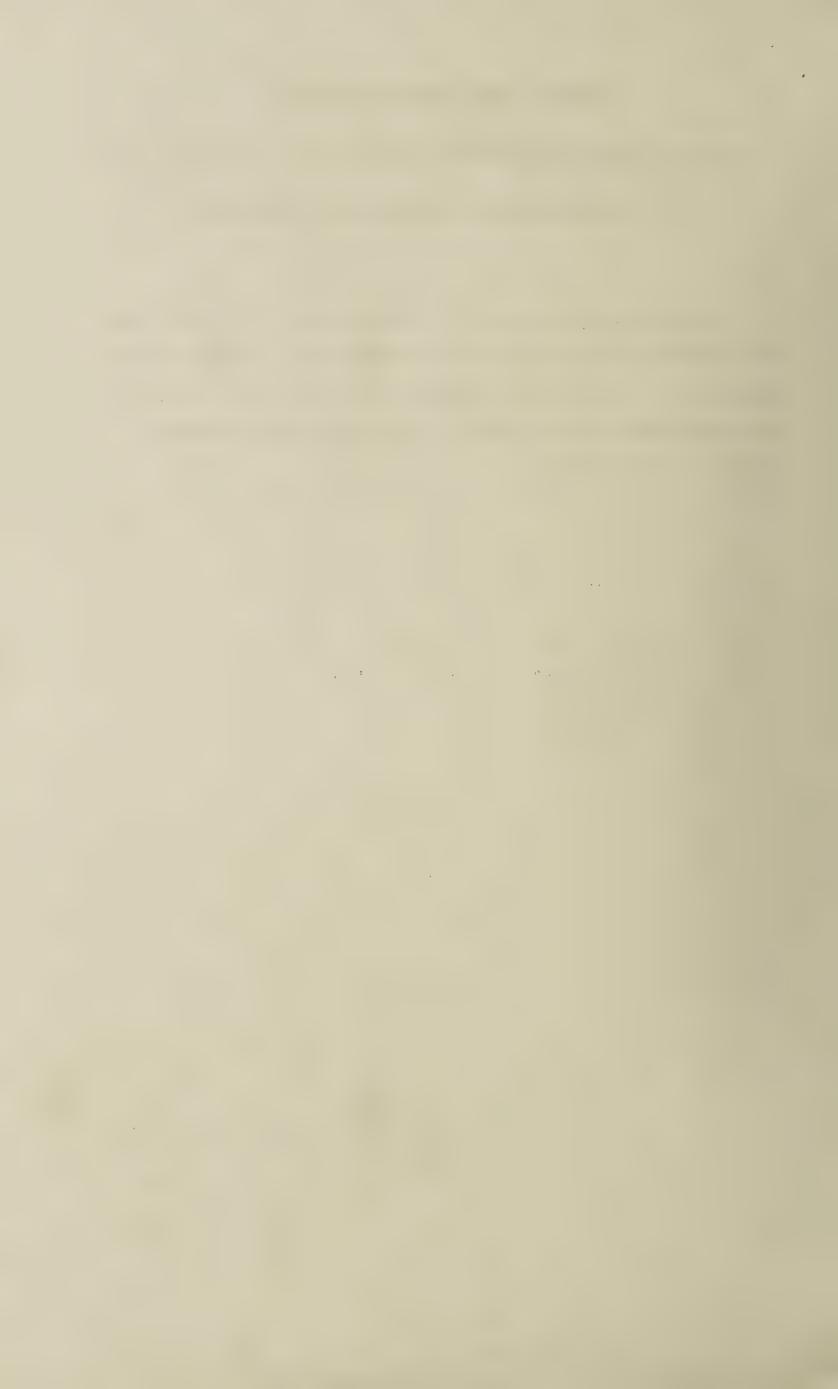

ALFRED E. WHITE.

May 26th 1938.

# REPORT of SANITARY INSPECTOR for YEAR ended 31st Decr. 1937 HOUSING ACTS. (OVERCROWDING PROVISIONS.)

During the year ended the 31st December 1937, the rooms of 979 working class houses in the Tenbury Rural District were measured. Particulars, including the number of occupants, ages and sexes were recorded and the "permitted numbers" fixed for each house.

Nuisance from stagnant water remed	
New Dust-bins provided	9
Accumulations of offensive matter	
Defective water pipes and fittings	causing waste. 58

## REPORT OF SAMITARY INSPECTOR.

REPORT upon accommodation provided for Hop-pickers in the Tenbury Rural District, Season 1937.

To:

Dr. A. E. White M.B., D.P.H.,

Medical Officer of Health,

Tenbury Rural District Council.

Dear Sir,

I beg to submit a Report upon the accommodation provided for persons engaged in picking hops in the Tenbury Rural District.

Copies of byelaws were sent to hop-growers and in a circular letter during August, growers were reminded specially of the need for careful and regular attention to closet accommodation provided for pickers and advice was given as to the best methods of constructing and maintaining Pail-closets and Trench-closets.

Growers were asked to give special attention to buildings normally used for animals and intended for use as pickers lodgings: - To provide substantial bins as Refuse receptacles: To arrange for thorough daily scavenging and for proper disposal of rubbish and refuse: To provide "Camp-Orderlies" capable of obtaining and maintaining thorough cleanliness among the pickers and their accommodation and surroundings.

Premises where pickers were to be housed were inspected before occupation. In accordance with byelaws, lodgings were limewashed or otherwise cleansed before use.

Hops were ripe earlier this year and in one or two places, picking began before the end of August.

Like last year, pickers were fewer than in previous seasons and not so easily obtainable, owing, I believe, to improved trade conditions in the Midland towns.

As for last year, there were seventeen growers in the district, there being nineteen camps.

On the 25th August I accompanied Dr. A. E. White, Medical Officer of Health and Dr. E. Donaldson of the Ministry of Health on visits of inspection to a number of hop farms in the district. Dr. Donaldson again visited on the 6th and 16th of September.

During his three visits, Dr. Donaldson inspected the accommodation provided for pickers at all hop farms in the Tenbury Rural District.

Infectious Diseases: - Two cases of Diphtheria were dealt with at one farm (Woodston Kilns). One case on the 1st Sept. and one on the 4th Sept. Both cases were sent to Worcester Isolation Hospital.

Every precautionary measure was taken to check and prevent the spread of infection. Straw beds were burnt and pickers quarters which were affected were sprayed with disinfectant. Also, I arranged for the frequent spraying of the pickers quarters throughout the season and a regulated supply of iodized lozenges to the pickers.

Forty-eight throat swabs taken by Dr. A. I. White, M.O.H., from child pickers at this farm gave negative results when examined at Worcester Laboratory.

I kept the camp under close observation, visiting it frequently by day and night in order to receive reports from the Nursing Mission stationed there and to deal speedily with any cases of suspected Diphtheria which might have arisen.

A supply of Throat Swabs was kept at the Camp. Several swabs taken at different times during the season gave negative results.

A case of Measles occurred at another farm. I arranged for the patient's immediate removal home to Halesowen by that town's ambulance. Proper precautionary measures were taken in the quarters affected and there were no further cases.

Here are some notes on the Nursing services and health of pickers at the hop farms:-

Shew & Beaumont, Stanford. Salvation Army nurse. No serious illness.

Morris, Stanford. do. do.

Moore, Stockton.

Roman Catholic Mission. No serious illness. One woman sent home (abortion).

Jones, Stockton.

Roman Catholic Mission. No serious illness beyond a woman being sent home for some complaint associated with pregnancy.

Eardiston Farming Co.

Private Nursing. Child case of Measles removed home by ambulance. There were a few cases of sore throats among children.

Firkins, Eardiston.

Private Nursing. No serious illness.

Two children sent home; Stated

suspected Measles.

Partridge, Lindridge. Private Nursing. No serious illness.

Pudge, Woodston Kilns.

Roman Catholic Mission. Two cases of Diphtheria. (See details in report above).

Eastham Bridge Barracks Roman Catholic Mission. Nothing (Pudge) serious. Only few sore throats.

Copper, Upper Woodston. Roman Catholic Mission. Nothing serious.

Nott, Newnham Bridge. Private Nurse. No serious illness.

Cooper, Knighton-on-Teme. do. do.

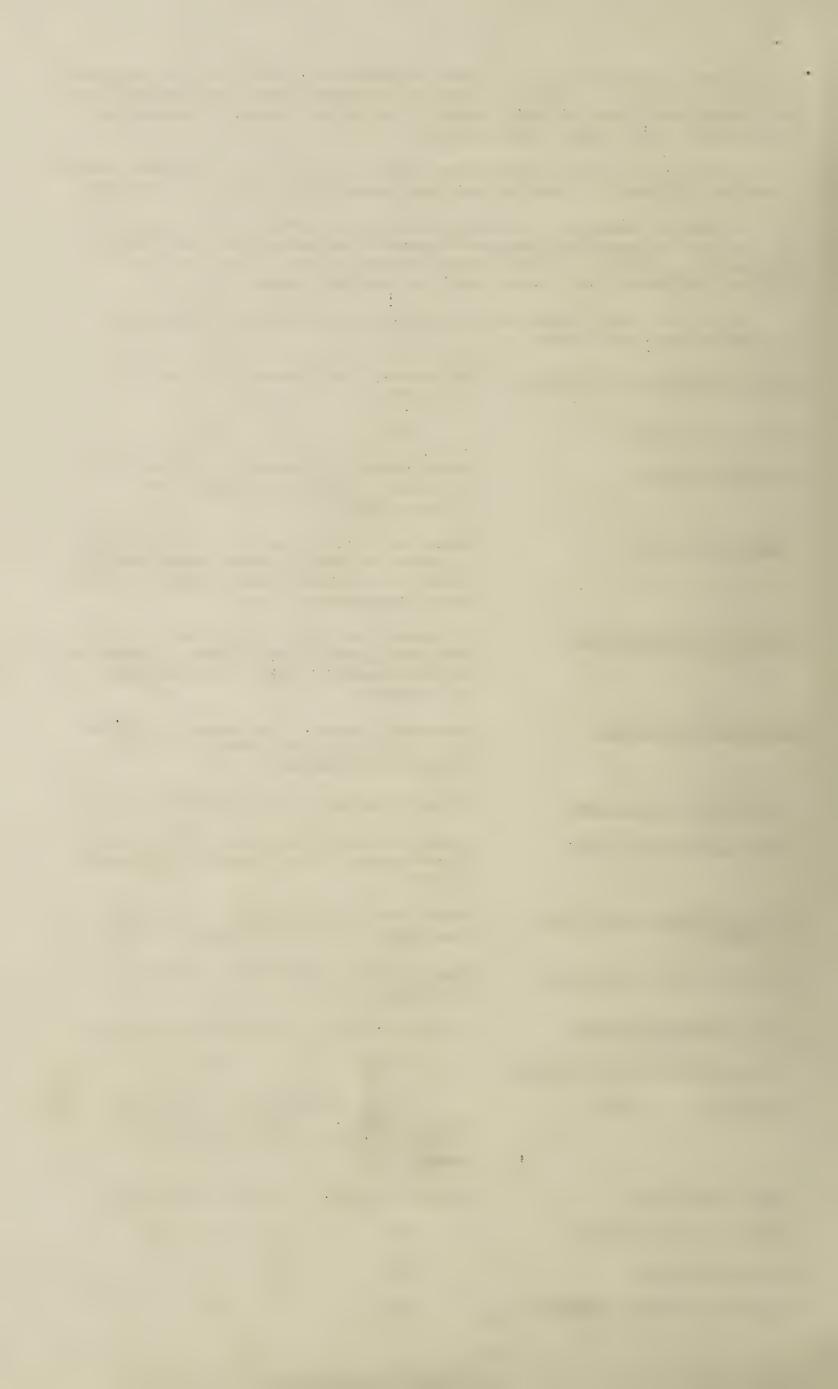

Froggatt, do. do. Nothing serious among the pickers. Stated a week-end visitor removed home died of pneumonia.

Nott, Kyrewood. Private Nurse. No serious illness.

Adams, Lower Rochford. do. do.

Moore, Eastham. do. do.

Haywood, Sutton, Tenbury. do. do.

Accommodation for pickers on the whole, was again good and further improvements upon last year's standard were to be seen.

The following is a summary of improvements made this year to Hop-pickers quarters in the Tenbury Rural District:-

Nott, Newnham Bridge.

New floors to large loft. Loft divided into cubicles. Ablution bench provided.

Pudge, Eastham Bdge. Bks.

Concrete floors to cookhouses and brick-built fireplaces provided at my request.

Moore, Eastham.

Improved closet accommodation. Sentry box type of closet provided.

Adams, Lower Rochford.

Great improvement here. Large loft in substantially built building converted and reconditioned for pickers sleeping room. Extra new exit, Landing, Staircase and new windows provided.

Nott, Kyrewood.

Ablution shed provided. Better arrangements for screening families provided. Courtyards concreted.

Cooper; Upper Woodston.

Sleeping quarters thoroughly reconditioned. Much improvement in general maintenance.

Partridge Lindridge.

More light and ventilation provided to sleeping quarters by new skylights and windows.

Eardiston Farming Co.

Additional seats for pickers provided.

Firkins, Eardiston.

Stalls under loft now cubicled. Pickers provided with hot water for washing purposes. Large loft improved by removal cubicles along one side, giving more room. Two ranges of barracks much improved by new windows to each cubicle.

Shew & Beaumont, Stanford.

Additional sleeping huts provided.

Morris, Orleton Ct. do.

New sleeping hut provided. Other improvements were new staircase and landing to one loft and two lofts divided into large cubicles. Front screens provided to cubicles.

Cooper, Knighton-on-Teme.

New addition to sleeping quarters and new closets provided.

I am, Sir,

Yours faithfully,

J. E. PARKINSON,

Sanitary Inspector.

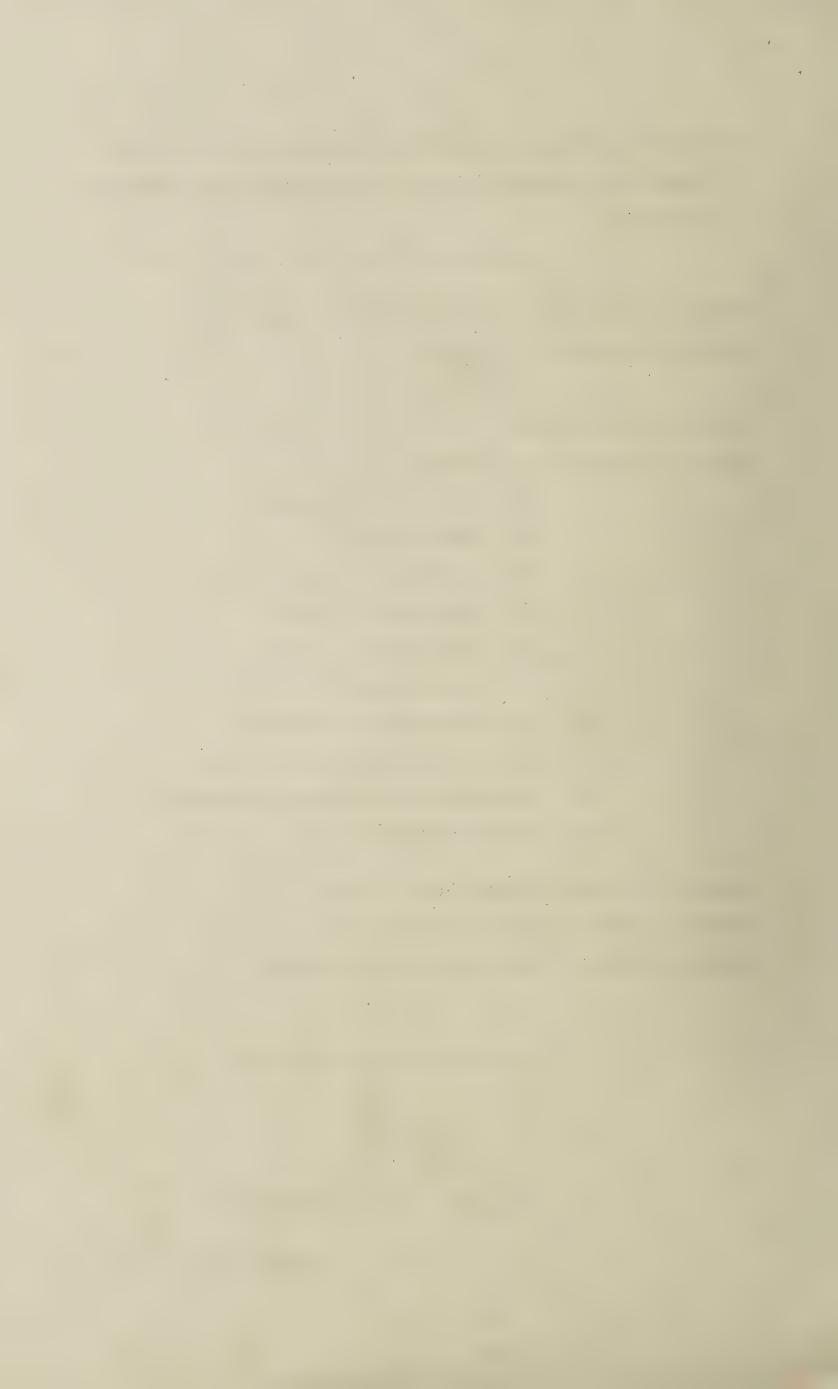

INSPECTION of DAIRIES, COWSHEDS and MILKSHOPS for the Year ended 31st December, 1937, in the Tenbury Rural Sanitary District.
